DETAILED ACTION

I. Rejection of claims 1,6-8 under 35 USC 102(b) as being anticipated by Netzer et al will not be maintained. Applicant is correct in that Netzer discloses the instant compound wherein the piperazine has a hydroxyl attached rather than an alkyl as disclosed by the instant claims.

Applicant's arguments, see paper, filed 11/7/05, with respect to the rejection(s) of claim(s) 1,6-8 under 35 USC 102(b) as being anticipated by Netzer et al have been fully considered and are persuasive. Therefore, the rejection and objection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of rejections below.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4,6-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then

Art Unit: 1616

narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 1 recites the broad recitation 5 to 7 saturated monocyclic radical which has 1 to 3 hetero atoms selected from nitrogen, oxygen, and sulfur, and the claim also recites a piperazinyl or homopiperazinyl each of which is substituted by lower alkyl which is the narrower statement of the range/limitation.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,6-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Zimmermann et al (WO 99/03854; 1/18/099). Zimmermann teaches the compound (I), 4-(4-methylpiperidin-1-ylmethyl)-N-[4-methyl-3-(4-pyridin-3-yl)pyrimidin-2-ylaminophenyl]benzamide. See abstract. Zimmermann teaches a pharmaceutical composition comprising the compound formula I. Zimmermann teaches that the composition can be administered orally to cancer patients. Zimmermann teaches the instant compound wherein R1 = 3-pyridyl; R7 = radical of formula (2); n = 0;

Art Unit: 1616

R2,R3,R5,R6 = H; and R9 = 4-piperazinyl. Instant dependent claim 8 discloses a composition to be used as an injection. Note in a claim to a composition a statement with respect to the composition's intended use has no patentable significance.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Zimmermann as applied claims 1,2,6-8 above. Zimmermann teaches all that is recited in claim 3 except for the compound having R4 = H. It would have been obvious to one having ordinary skill in the art to have made the instant compound wherein R4 = H. One would have been motivated to do this since H and methyl have been shown to be chemically equivalent, and therefore, yield similar activity.
